PREPAID WATER METERING

PREPAID WATER METERING

Versatile, smart and easy to use, the Utility Systems prepaid water metering solution addresses most metering challenges.

Not only is this the first commercially available and proven prepaid water metering system, but it also offers you a range of additional key services.

Approved by the STS Association and enabled with Automated Meter Reading (AMR) and Advanced Metering Infrastructure (AMI) capabilities, our prepaid water metering solution prevents water wastage and allows for accurate water balancing.

You can also increase revenue collection, while giving consumers the opportunity to visibly monitor their water consumption.

Increase revenue collection, prevent wastage and allow for accurate water balancing using Utility Systems' prepaid water metering solution.
